

## Simple - Safe - Smart

SmartScripts is an entirely new type of pharmacy called Regimen Management. Our team of healthcare professionals have developed this system to help our patients remain healthy by making the process of filling and taking medications safe, convenient, and less expensive.

### Personal Medication Review and Synchronization

The entire process begins with a SmartScripts pharmacist performing a review of your medical history, current medications and vitamins to ensure there are no duplications or interactions. Next we synchronize all medications to fill the same day every month eliminating multiple trips and calls to the pharmacy.

### Custom Packaging

Your medications are then pre-sorted in individual packets organized by date and time of day with descriptions of each medication.

### Delivered to Your Door

A new box containing all of your pre-sorted meds will be delivered right to your door every 30 days automatically free of charge, no need to call.

### Proactive Refill Management

Our pharmacy staff will proactively manage your medication refills so you never run out again. We work with your doctor to get refills well before you run out.

### Best of All..... It is less expensive!

We believe in value and giving back to our customers, therefore we have created a one of a kind program to save you money.

**Saturday**

Smith, Tony 1 of 1  
 Saturday 06/03/12 Breakfast  
 1 ASPIRIN EC 81 MG  
 1 FERROUS SULFATE 325 MG
