Rx Manage FAQs

How do I place an order on the Personal Importation Program?

Ordering is easy! You can either phone our customer service representatives at 1-800-883-8841 or complete an enrollment form and fax it to our dedicated electronic fax at 1-800-883-1814.

We require a current prescription written by your Doctor to be faxed to our dedicated electronic fax at 1-800-883-1814 for each medication ordered.

Your order will be reviewed for eligibility, dose and drug interactions, and following approval will be transferred to the pharmacy for dispensing and shipping.

You will receive your medication within 10-15 working days of the order shipping.

How do I place a refill order?

You don't need to worry about remembering to place a refill order! 65 days after your initial order has been filled a refill order will automatically be placed.

You will receive a refill reminder by phone or email (please let us know your preferred option) to say that a refill order has been placed and that any changes to your medication or shipping addresses should be transmitted to **RX Manage** within 48 hours.

If no changes are submitted the order will automatically be shipped, ensuring a smooth continuous supply of medication.

Will my medication be exactly the same as what I currently take?

Yes it will. To qualify for the Personal Importation Program a medication must be available from the same manufacturer internationally as the US brand, or from the license holder for the international version of that brand medication.

Sometimes Pharmaceutical companies use different names for the same medication internationally so your medication may not be called the same as it is in the USA. Tablet appearance can also differ between countries for the same medication. Rest assured that to meet the requirements of the Program each medication is thoroughly researched by our pharmacist to ensure it is bio-equivalent and dose-equivalent to the US brand.

Where do I go if I have questions about the program?

Our call center is open 9am-9pm Monday to Friday (EST) and 9am to 4pm Saturday and Sunday to answer simple questions or take your orders.

Call us on 1-800-883-8841

You can email inquiries@rxmanage.com if you have a more complex question.

What medication can I get on the Personal Importation Program?

A formulary of approximately 200 brand medications is available to order. To be included on the formulary, the medication must be a maintenance medication for a chronic condition, with no generic equivalent available on the USA market. The following medications are NOT offered on the formulary;

- Medications for acute conditions
- Medications requiring special storage conditions
- Controlled or scheduled medications
- Medications with narrow therapeutic indices, requiring ongoing monitoring/dose adjustments

If you do not see your medication listed on our formulary, please ask our customer service representatives.
